

CS 1301 - Homework 08

Due before October 17, 1:57 *am* on Vista (WebCT). You can resubmit your work up until the deadline.

NOTES:

- You must use arrays to solve these problems. You should *try* to use methods.
 - All problems ask you to read 10 integers from the user. Instead, read 5 integers (to make testing easier).
1. **AboveAverage.java** – Do problem 6.1 from the text.
 2. **ReversePrint.java** – Do problem 6.3 from the text.
 3. **Unique.java** – Do problem 6.5 from the text.
