Sprint 1 Grading Rubric

The Sprint 1 rubric weights sum to 100%. The resulting Sprint 1 score will then be scaled to 20% of your final course grade. Sprints 1, 2, and 3 are each worth 20% of the final course grade.

Category	Weight
Functional Implementation	30
Unit Tests	10
Integration Tests	10
Architecture & Design (MVC)	15
Code quality & OO Design	15
Version Control & Project Management	10
Demo & Usability	10
Individual Contributions (-100 to 0 points)*	
Total	100

*Each student is expected to contribute 22 or more hours during Sprint 1. Time must be logged consistently throughout the sprint, recorded promptly and with clear and accurate *Description of Activity*, and supported by corresponding GitHub activity (commits, pull requests, reviews, issues, etc.). Students who satisfy these expectations incur no penalty. Students who fail to contribute meaningfully may receive a substantial individual point deduction independent of the team's project grade.
